

Mad Science: Etching with Salt Water

Supply list

A supply kit will be provided by the instructor for \$50- 70. Cash or check only.

Students should bring:

6 x 12" 20 ga. jewelers brass sheet
Exacto or breakaway cutting knife
Cutting mat size 8 x 10 or similar

Rio Grande #130120
any supplier
available at office supply and craft
stores

***1 gallon saturated salt solution made 24 hours in advance (see recipe below)

****Saturated salt solution recipe

Make this ahead and bring to class:

You will need 1 gallon distilled water
 4 cups kosher or pickling salt available at all grocery stores
 MUST BE NON-IODIZED

Heat almost a gallon of distilled water (don't boil), and stir in kosher or pickling salt, a cup at a time with wooden spoon until completely dissolved. If salt starts to precipitate (you will see white flakes) add the remaining water until solution is clear. Cool and pour back into container.
